

Strengthen Your Cyber Defences

Cyber-As-A-Service

Ensure your business is aligned and compliant with the most up-to-date cyber security practices and bolster your defences against cyber-attacks and data breaches.

Every 39 seconds, a cyber-attack occurs

of breached small businesses close within six months

AUSTRALIAN CYBER SECURITY CENTER'S ESSENTIAL 8

Protect Your Business, People & Reputation

Discover how aligning with the ACSC's Essential 8 can help bolster your defences.

Control which applications run on your network, reducing the risk of unauthorised or malicious software gaining access.

Continuous updates to your applications closes the door on vulnerabilities before they can be exploited.

Enhance the utility of Microsoft Office without sacrificing security, by controlling macro behaviors.

Minimise the common pathways attackers use to compromise your system, ensuring a robust defence.

Limit the number of users who can change critical settings, ensuring that your cyber defence mechanisms remain intact.

Keep your OS up-to-date to minimise the risk of system-wide vulnerabilities.

Add an additional layer of security to ensure that your data remains secure even if passwords are compromised.

In the unfortunate event of data loss, ensure business continuity by regularly backing up your business' important data.

Moving Up the Maturity Ladder

Boosting your cyber security does not happen overnight. It is a journey that takes your business closer to the next level with each step. With the Essential 8, there are four maturity levels:

MATURITY LEVEL	WHAT IT MEANS
0	Your organisation has basic preventative security but is not aligned with the mitigation strategy. Without a strategy, your organisation is at a higher risk of unauthorised access.
1	Your organisation has low compliance and is partly aligned with the mitigation strategy. You have implemented the minimum requirements to align with the Essential 8 controls.
2	Your organisation has medium compliance and is mostly aligned with the mitigation strategy. This is the recommended maturity level for most businesses.
3	Your organisation is highly protected and is full aligned with the mitigation strategy. This is the recommended level for businesses with highly sensitive data and regulatory obligations such as medical practices and financial services.

Security is a Journey

Cyber-As-A-Service Packages

Cyber security is a never-ending journey, with unexpected twists and constant turns. You can rest easy knowing you're in good hands with the cyber security experts at Inspired IT. Our team will prepare a tailored roadmap to make your journey as smooth as possible, while providing the agility your business needs to face new challenges.

Following a thorough onboarding process, we will deliver each maturity level as a project, until you reach level 2. For larger organisations, we may work with you to reach level 3.
